MaloneyNerveInstitute.com Dispels Myths and Mysteries of Nerve Related Problems

TUCSON, AZ (March 8, 2011) – The doctors of the Maloney Nerve Institute have many years of experience and expertise in the field of peripheral nerve surgery, utilizing some of the most advanced procedures and techniques available today. Now, they have also harnessed the power of the Internet, developing MaloneyNerveInstitute.com to educate visitors about nerve-related pain, nerve injuries, and the surgical and non-surgical treatment procedures available today.

“At the Maloney Nerve Institute, we are continuously doing research and participating in humanitarian efforts to increase the quality of life of patients who have been suffering from debilitating nerve pain for many years”, said Dr. Christopher T. Maloney, Jr., continuing, “As new treatment options become available, we study and refine these techniques to be able to best use them to help our patients. By making information about nerve-related pain accessible, we hope to reach more people who suffer from nerve pain in the hopes of dispelling the myths and mysteries of restoring normal function to the nerves.”

MaloneyNerveInstitute.com includes information and downloadable tutorial brochures to help patients easily identify causes, symptoms and treatment options available for nerve-related issues and the causes. Carpal tunnel syndrome, diabetic neuropathy, knee pain, groin pain, Morton’s neuroma, nerve injuries and nerve related headaches are just some of the topics covered in detail. Visitors are also presented with the latest treatment options, including nerve decompression, which helps relieve pressure on nerves caused by swelling of the nerves and surrounding tissues.

To find out more about the Maloney Nerve Institute’s research, visit MaloneyNerveInstitute.com.

About the Maloney Nerve Institute

Christopher Maloney, MD, a board certified plastic surgeon who specializes in peripheral nerve surgery, along with A. Lee Dellon, MD, started The Institute For Plastic Surgery and Peripheral Nerve Surgery in 2004 in Tucson, Arizona. Together they were responsible for the training and mentoring of numerous doctors and students practicing medicine throughout the United States. Dr. Maloney has lectured internationally on nerve related topics as well as participated in humanitarian efforts in Ecuador for patients suffering from nerve pain. Dr. Maloney uses his extensive experience, education and training to ensure the best care and highest success rate for his patients’ surgical outcomes. Dr. Maloney is a Clinical Associate Professor of Plastic Surgery and Neurosurgery at the University of Arizona and a member of the American Society of Peripheral Nerve Surgeons.
